

Section 1: Game Description

Set inside of a grocery store, the game places the player in the role of a shoplifter. To win the game, the player must collect all grocery items placed around the store and swiftly make their way to the exit without being caught by a security guard.

Throughout the grocery store, security guards are sparsely distributed. These security guards will chase the main character when the player gets near. Moreover, if a security guard catches up to the main character, the game ends, and the player loses.

The grocery store is a square grid divided into distinct themed sections, including a produce section, a meat section, an aisle section, and a technology section. Each area contains unique items the player must collect, as well as unique hazards. Aisles, freezers, and displays will act as barriers, creating intricate pathways and creating a maze-like environment, designed to feel novel at each turn. Additionally, third-party workers will periodically spawn in to block certain paths (they won't chase the player), contributing to dynamic and exciting gameplay.

If the player runs through a hazard, they will lose score and absorb a unique punishment. As a result, if the player's score drops below zero at any point, the game is over, and the player loses.

On top of collecting regular grocery items, the player can improve their score by collecting cash. These cash drops stay on the board for a brief period, providing a challenge for the player to collect them. This feature provides the player with an opportunity to continually improve their high score.

Throughout the game, the UI shows the player's current score and how long the player has lasted. Moreover, if the player wins the game, their final score and completion time are displayed.

In conclusion, our game is set from the perspective of a shoplifter who robs a grocery store. The main objective is to collect all the grocery items while avoiding security guards and ultimately exiting the store. The game will feature different sections of a grocery store, each with unique layouts, rewards, and hazards. Additionally, the game includes bonus rewards for players who want an additional challenge, concurrently adding depth to the game.
